# ICD - 10

## ICD-10-CM Training

Trauma registries are an essential component of any trauma program. They are increasingly complex and require highly skilled and knowledgeable personnel.

The trauma registrar is the key to this success!

CODE  
FOR  
A CAUSE

The trauma registrar's codes must be accurate. The ICD-10-CM codes are used for mapping to AIS severity, as well as usage for medical research. Therefore, the codes must be accurate.

The ICD-10-CM systems have over 14,400 codes to describe all medical elements. These are broken down into 22 specific chapters. Pomphrey Consulting has developed a comprehensive course which focuses on the chapters where "injuries" meeting the national inclusion criteria are found.

**Focused time on focused topics!**

# FACULTY & STAFF

All authors & faculty members have extensive experience. They are AHIMIA Ambassadors, Associate Professors of HIM collect programs, Clinical Experience Coordinators, and HIM Hospital Directors. Their credentials include: MBA, MED, RHIA, MHIM, CDIP, CHIS-IM, CPHIMS, and FAHIMA.

We bring this vast experience and insight to you! Additionally, we bring the same level of dedication to you which extends beyond the end of class.

### Our MISSION:

To empower trauma centers through quality education, training, and staffing in the pursuit of quality data.
